How far would you go to escape the apocalypse?

Summary:

Sirius is a mystery thriller that takes an in-depth look at the unbelievable story of the Order of the Solar Temple, a cult that made headlines in the 90s. Three journalists teamed up to investigate two random accidents – two house fires with casualties, one in Canada, one in Switzerland - too similar to be coincidental. In a worldwide investigation, with the help of chance encounters, forensic analysis and exhibits, they linked those events to The Order of the Solar Temple. In this obscure cult, the followers believed that they could, through suicide, be transported to the star Sirius in order to live out an afterlife. The journalists started to wonder: was it a mass suicide? Can it happen again? And if so, where? The exclusive testimony and personal archive of the lead journalist (Arnaud Bédard) will guide us through the investigation along with exceptional archives, testimonies from police officers, judges and former members of the sect.
